Subject: Application for Process Engineer Lithography (d/m/f) - Req. 22816

Dear Ms. Kleierl and Hiring Team,

I am writing to express my strong enthusiasm for the Optical Engineer in Adaptive Optics position (Req. 83079). Concluding my PhD in Innsbruck, my extensive hands-on experience designing and controlling closed-loop adaptive optics hardware directly aligns with Fraunhofer IOSB's research in atmospheric turbulence mitigation and free-space optical communications.

In my current role, I manage the operational readiness of advanced optical systems, implementing AO hardware to compensate for severe biological scattering. The underlying physical principles of wavefront control I utilize are directly applicable to correcting atmospheric distortions in target-in-the-loop systems.

Adaptive Optics & Wavefront Control:

During my PhD, I built multiple closed-loop AO setups from scratch, integrating spatial light modulators, high-power lasers, and sensitive detection hardware. I am well-versed in the precise metrology required to optimize light propagation through complex media.

Software Control & Python Processing:

I have developed high-performance image processing and wavefront control pipelines using Python (and GPU-accelerated JAX). I am eager to apply these skills toward your real-time control and deep learning-based wavefront sensing challenges.

Research & Development Bridge:

From industrial machine vision at INTECOL to prototyping at IPHT Jena and AO research in Innsbruck, I thrive at the interface of theoretical science and practical robustness. I am highly motivated to contribute to Fraunhofer's mission of transforming applied research into critical future technologies.

While my professional language is English, I hold a strong working proficiency in German and am fully capable of writing technical reports. As a Colombian concluding my PhD in Austria, I will be eligible for a graduate work permit, making hiring seamless. I welcome the opportunity to discuss how my AO expertise can support the Adaptive Optics Group.

Sincerely,

Juan David Muñoz-Bolaños

Optical System Engineer

PROFESSIONAL SUMMARY

Optical Engineer with hands-on expertise in Adaptive Optics (AO) hardware implementation and wavefront control. Strong background in correcting optical aberrations and light propagation in scattering media, directly applicable to atmospheric turbulence. Proficient in Python-based software control for closed-loop AO systems, image processing, and complex optical metrology.

TECHNICAL COMPETENCIES

Adaptive Optics & Wavefront Control

Hardware design and implementation of closed-loop AO systems. Extensive practical experience with spatial light modulators, wavefront sensors, and aligning complex optical benches for aberration compensation.

Software & Real-Time Control

Programming: Advanced Python (JAX, NumPy) for high-performance data processing pipelines and hardware control. Experience interfacing software with sensitive optical equipment. Embedded: FPGA (LabView) hands-on for real-time applications.

Light Propagation & Metrology

Nonlinear optics and precision metrology focusing on signal-to-noise optimization in photon-starved regimes. Experience handling high-power continuous-wave and pulsed lasers.

PROFESSIONAL EXPERIENCE

Medical University of Innsbruck

Innsbruck, Austria

PhD Researcher - Optical Engineering

Jan 2022 – Present

- **Adaptive Optics Hardware:** Designed, built, and implemented novel closed-loop AO control systems from the ground up to correct severe optical aberrations.
- **Software Control Pipeline:** Developed high-performance, GPU-accelerated Python pipelines to interface with wavefront sensors and control sensitive optical hardware.
- **Complex System Integration:** Prototyped and maintained advanced nonlinear microscopy setups, balancing high-power laser propagation with precise metrology.

Leibniz Institute of Photonic Technology (IPHT)

Jena, Germany

R&D Assistant Researcher

Jun 2020 – Dec 2021

- **System Prototyping:** Assembled vibrational imaging prototypes, integrating fiber probes, spectrometers, and continuous-wave lasers.
- **Data Analysis:** Applied machine learning and structured data analysis techniques to identify complex signal patterns from noisy datasets.

INTECOL S.A.S.

Medellin, Colombia

Machine Vision System Engineer

Mar 2018 – Mar 2019

- **Hardware/Software Interface:** Developed industrial tracking and quality control systems using computer vision, focusing on robust real-time performance.
- **System Reliability:** Managed product lifecycles for safety-critical optical inspection systems, ensuring meticulous operation.

EDUCATION

Medical University of Innsbruck
Ph.D. in Adaptive Optics & Microscopy

Austria
Jan 2022 – Present

Friedrich Schiller University Jena
M.Sc. in Photonics

Germany
2019 – 2021

University of Cauca
B.Sc. in Physics Engineering

Colombia
2012 – 2018

INTECOL

OPTIMIZING THE RHYTHM OF THE WORLD

Medellin, February 4, 2019

TO WHOM IT MAY CONCERN

Integración Tecnológica Industrial Intecol S.A.S. with Tax ID (NIT) 811.041.410-4 certifies that Mr. JUAN DAVID MUÑOZ BOLAÑOS, identified with Citizenship ID No. 1.061.772.278, has been employed by this company since July 3, 2018, under an indefinite term contract, serving in the position of Junior Project Engineer;

earning a salary of One million five hundred thousand pesos (\$1,500,000) plus three hundred thousand pesos (\$300,000) mobility allowance.

I will gladly address any additional information at the phone number 316 3322.

We appreciate your attention,

INTECOL

AGREEMENT FOR GUESTS

to carry out a practical training

with

Mr. **Juan David Munoz Bolanos** Date of birth: **1994-06-04**
temporarily living at **Emil-Wölk-Str. 7, 07747 Jena** (guest),

Student of the Friedrich-Schiller-University Jena, Abbe School of Photonics, gets in execution of his practical course in the research department Spectroscopy and Imaging, working group Raman and Infrared Histopathology (0104) from 2021-01-01 up to 2021-09-30 admission to the necessary rooms within Leibniz-IPHT.

The use of further devices, media and other infrastructure takes place in agreement with the Heads of the respective departments.

Mr. Juan David Munoz Bolanos has to observe the security regulations for working and other regulations valid in Institute as well as instructions of the laboratory and clean room responsible persons of the Leibniz-IPHT.

Mr. Juan David Munoz Bolanos has to treat all affairs and procedures strictly confidential. Copies, duplicates and others of business and technical information of each kind are forbidden, unless these are sanctioned by the responsible Department Heads.

Publications, reports and lectures about topics which belong together with the fields of work of Leibniz-IPHT require the previous written agreement of the Executive Board.

The liability of Mr. Juan David Munoz Bolanos is limited to cases of wilful action and gross negligence.

Mr. Juan David Munoz Bolanos is insured against accidents on the Friedrich-Schiller-University Jena, Abbe School of Photonics in the context of his/her practical course during his/her length of stay at Leibniz-IPHT.

Jena, 13 November 2020

Prof. J. Popp
Chairman
of Leibniz-IPHT

F. Sondermann
Executive Member
of Leibniz-IPHT
