Application for Junior Engineer R&D Prototyping Quality | Ref. 1385609133

Date: May 1, 2026

Dear Sir or Madam,

I am writing to express my strong interest in the Junior Engineer R&D Prototyping Quality position at AT&S. As a physicist with extensive experience in the development and qualification of high precision optical measurement systems, I am fascinated by AT&S's leading role in the industrialization of high end printed circuit boards and IC substrates. I will complete my PhD at the Medical University of Innsbruck in June 2026 and am eager to bring my expertise in prototyping and quality assurance to your team in Leoben.

Throughout my doctoral research, I have been responsible for the entire development chain of complex instrumentation, from CAD based prototyping to final system qualification. A key focus of my work has been the handling and calibration of advanced metrology hardware as well as the implementation of Measurement System Analysis (MSA) to ensure high process stability. In my daily laboratory work, I am highly proficient in handling high power lasers and sophisticated optical systems. Furthermore, my participation in the ASML and ZEISS SMT Summer Schools has provided me with a deep understanding of semiconductor manufacturing requirements and the critical importance of precision and quality during the industrialization phase.

My professional approach is characterized by a structured methodology, technical proficiency, and a strong sense of individual responsibility. Working in international research teams has taught me to communicate complex technical concepts precisely in English and to develop cross functional solutions. I am fully prepared for international travel to AT&S locations as required.

I am highly motivated to apply my technical passion and experience in R&D quality assurance at AT&S. As a Colombian citizen, I hold a residence permit that seamlessly converts into a work permit.

I look forward to the opportunity to discuss my qualifications with you in a personal interview.

Sincerely,

Juan David Muñoz Bolaños
