Application for Absolvent:in einer technischen HTL / FH / Uni | Ref. 182453

Dear Ms. Schernthaner,

First, I would like to apologize for accidentally submitting an incorrect application previously by pressing the send button too early. Here are my correct application documents for the position of Absolvent:in einer technischen HTL / FH / Uni.

As an engineer specializing in optical metrology and optomechatronics, my career is built at the intersection of academic and applied research. Following my Bachelor degree, I completed a ten month basic training as a Junior Machine Vision Engineer. This practical foundation inspired me to pursue my Master in Jena and my PhD at the Medical University of Innsbruck focused on integration of optics, fine mechanics, electronics, and software engineering for the application of imaging small brain structures with resolution smaller than 1 μm . This multidisciplinary background drives my motivation to learn more about complex semiconductor machines, which require also advanced integration technologies. This recent graduates position is an ideal opportunity for me to transition from academic research into a professional semiconductor industrial environment at Besi Radfeld.

In my research work, I have developed complex systems from the ground up, ranging from CAD based mechanical design to software control in C++ and Python. A major focus was the implementation of feedback loops for correction of optical aberrations. Furthermore, participating in the Summer Schools of ASML and ZEISS SMT gave me valuable insights into the extreme precision requirements of semiconductor manufacturing such as the present in Besi.

Having lived in Innsbruck for several years, Tyrol has truly become a second home to me. As I complete my PhD this May 2026, I am looking forward to contributing to and learning from your team in Radfeld over the long term, specifically by trying to find new solutions for your technical challenges. Originally from Colombia, I have embraced the local culture, and my Austrian residence permit allows for a seamless transition to full work authorization starting from May 17 2026.

I would be grateful for the opportunity to discuss my qualifications with you in an interview.

Sincerely,

Juan David Muñoz Bolaños
